

Using TreeSize to analyse your disk space

JAM Software is a reputable provider offering a free version of their disk space analyser, TreeSize..

Windows security and user privacy are protected as the file content isn't read; the tool simply scans the files to check the drives for space and usage to simplify file clean-up and optimisation.

To get started go to: https://www.jam-software.com/treesize_free

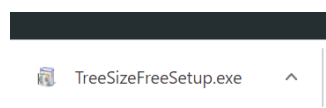

And click the 'Free Download' button.

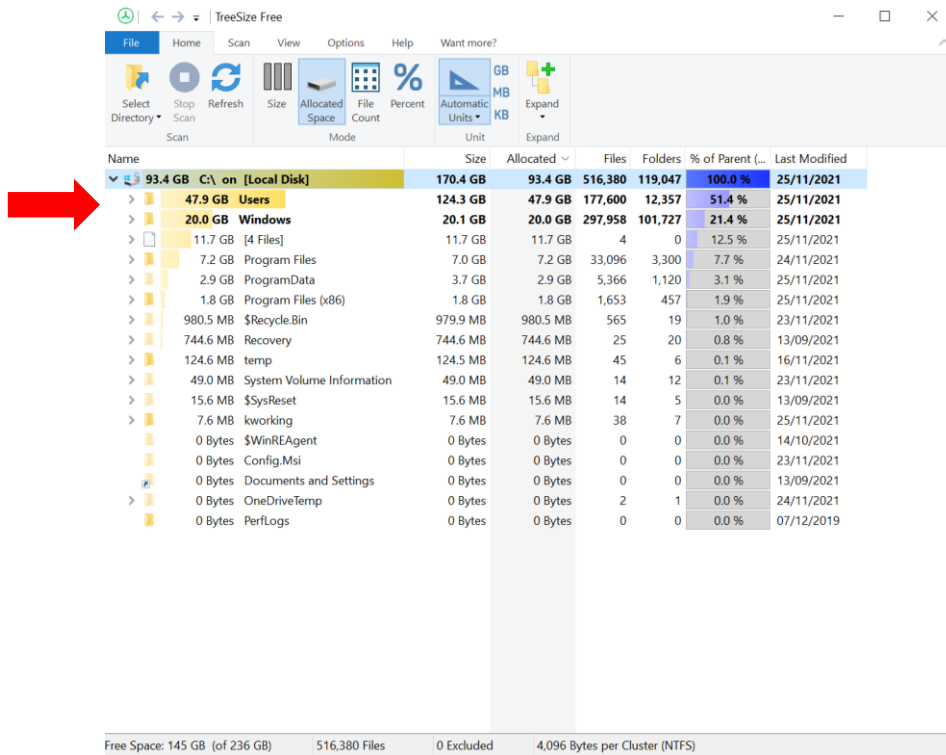

Now you will have the option to choose which version you would like. For this purpose we chose the TreeSize Free and clicked 'Free Download'

What is Your Solution?	TreeSize Free	TreeSize Personal	TreeSize Professional
	Free Download	30 Days Free Trial	30 Days Free Trial
		Buy Now from 21,95 €	Buy Now from 47,95 €
Filters scan results according to different criteria	✓	✓	✓
Breaks down scan results according to owner, file type, 100 largest files, etc.	—	✓	✓
Versatile file search with duplicate finder and deduplication	—	✓	✓
Export to Excel, HTML and Email	—	✓	✓
Automation support and command line options	—	—	✓

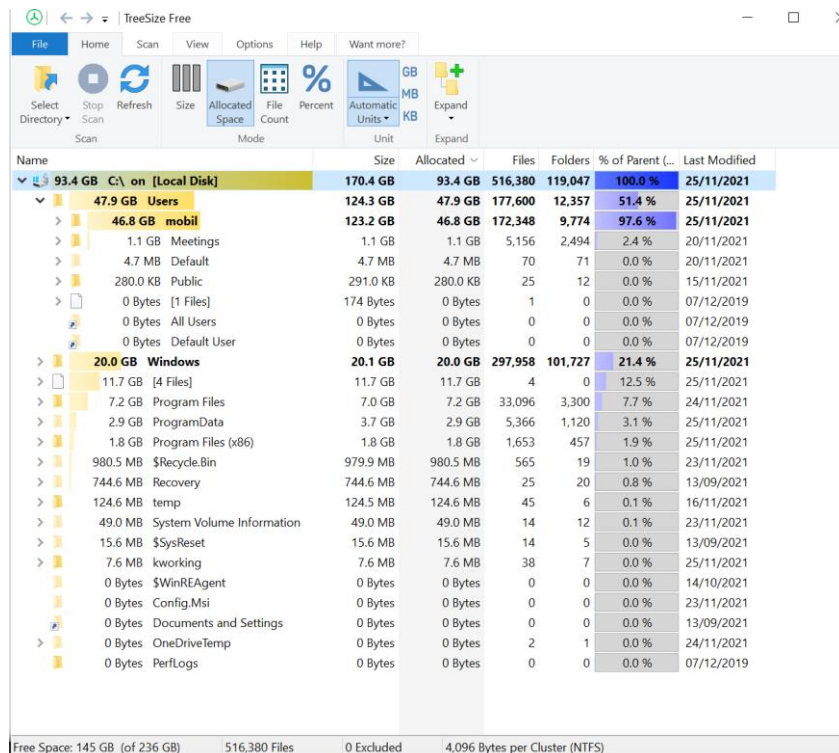

Once this has downloaded you will see the file on your desktop

Click on this to open and run the tool. You will see the results like the image below. For further information click the arrows to expand the selection.

This shows the size of folders within the category, this can then be expanded further in the same way to display which folders or files are taking up the space.

Once you have this analysis you can decide if you want to delete any files or move them to free up space
